

Three-Card Poker

Three Card Poker is variation of poker that offers three exciting ways to play.

You can choose to only bet against the house hand by placing an ANTE wager. After you look at the three cards dealt to you, you have the option to FOLD or to make a PLAY wager. If you make the PLAY wager and your hand is better than the house's qualifying hand of queen or better, you win both your ANTE and PLAY wagers at odds of 1:1. If the house does not have a qualifying hand, you win your ANTE wager at odds of 1:1 and you push on your PLAY wager.

You can choose to only bet on your own hand by placing a PAIR PLUS wager. If your hand is a pair or better, you win your PAIR PLUS wager according to the posted payable.

You can also choose to bet both options by placing wagers on the ANTE and PAIR PLUS. If you make both wagers but do not make a PLAY wager, you forfeit the ANTE and PAIR PLUS wagers.
